ANUBHAV SINGH

Software Engineer | Backend & Systems

7355026966 | anubhavsingh2027@gmail.com

[**Linkedin]** linkedin.com/in/anubhav-singh |[**Portfolio]** anubhav.nav-code.com | [**GitHub]** github.com/anubhavsingh2027

Professional Summary:

Software Engineer with strong expertise in Data Structures & Algorithms (850+ problems solved) and backend development using Node.js. Experienced in building scalable systems, optimizing performance, and designing real-time applications. Strong foundation in system design, API design, authentication & authorization, and writing efficient code.

Technical Skills:

- Languages: C++, Python, C
- Core Concepts: Data Structures & Algorithms, System Design, OOPs
- Backend: Node.js, Express.js, Socket.IO
- Databases: MongoDB, SQL
- Tools: Git, Docker, Redis, Postman
- Web: HTML, CSS, JavaScript, React

Achievements:

- Solved **850+ DSA problems** across LeetCode and other platforms, with strong proficiency in **Graphs, Dynamic Programming, and Trees.**
- Maintained a **450+ day problem-solving streak on LeetCode**, demonstrating strong consistency and discipline
- Achieved 5★ Problem Solving badge on HackerRank.

Projects:

- **Real Time Chatting Application** **Aug2025 – Nov2025**
  - **Live :** real-time-chatting.nav-code.com **| Source :** github.com/anubhavsingh2027/Real-Time-Chatting
  - Engineered a real-time chat system supporting **1K+ concurrent users**, optimizing **low-latency communication (<120ms)** using efficient event-driven architecture.
  - Designed scalable backend using **Redis caching and WebSockets**, improving system performance and concurrency handling.
  - Deployed a **production-ready cloud application** with optimized message delivery and presence tracking.

- **Phishield (URL Detector)** **Feb2025 – May2025**
  - **Live :** phishshield.nav-code.com **| Source :** github.com/anubhavsingh2027/Phishsheild
  - Designed real-time URL analysis pipeline with efficient API handling, reducing false positives.
  - Built secure verification flow using OTP-based validation.
  - Developed analytics dashboard for threat tracking and scan history**.**

- **KashiRoute** **Sep2024 – Dec2024**
  - **Live :** kashiroute.nav-code.com **| Source :** github.com/anubhavsingh2027/KashiRoute
  - Built full-stack travel booking platform with user/admin dashboards and role-based access control.
  - Designed booking system with transaction flow and consistency handling.
  - Optimized MongoDB queries and APIs for efficient booking and real-time data handling.

Education:

Pranveer Singh Institute of Technology, Kanpur

Bachelor of Technology (B.Tech) — Computer Science and Engineering (CSE), Specialization in Artificial Intelligence

Apr 2023- May 2027 | CGPA:7.1

Certification:

- **Cyber Security Bootcamp – YHills | Backend Development – Knowledge Gate**
